Container Unloading Station

Presenting – Container Unloading Station

Our established CES for bulk goods from shipping containers. Optimized processes and a high level of safety thanks to weather protection, automation and the familiar modular container design.

Modular Setup

Tech-Container for Equipment and Operator

Required compressors and filters can be enclosed

Operator station with desk and touch panel

Weather-protected and air-conditioned working environment

Compact and Efficient Solution

Little space required and installation without planning permission

The system can be relocated on site if necessary

Assembly on site is completed in just a few days

Custom solutions for your requirements

Whether ATEX, food, pharmaceutical or special factory standards, the CES can be adapted to your challenges

**WWTec GmbH & Co. KG –
solutions for
your process**

Modular design adapted to your process. The CES only comes with the essential components you actually require for container unloading.

Container Unloading Station

WWTec GmbH & Co. KG – solutions for your process

The combi version allows you to unload silo trucks and shipping containers using a single machine.

Certified for explosive challenges

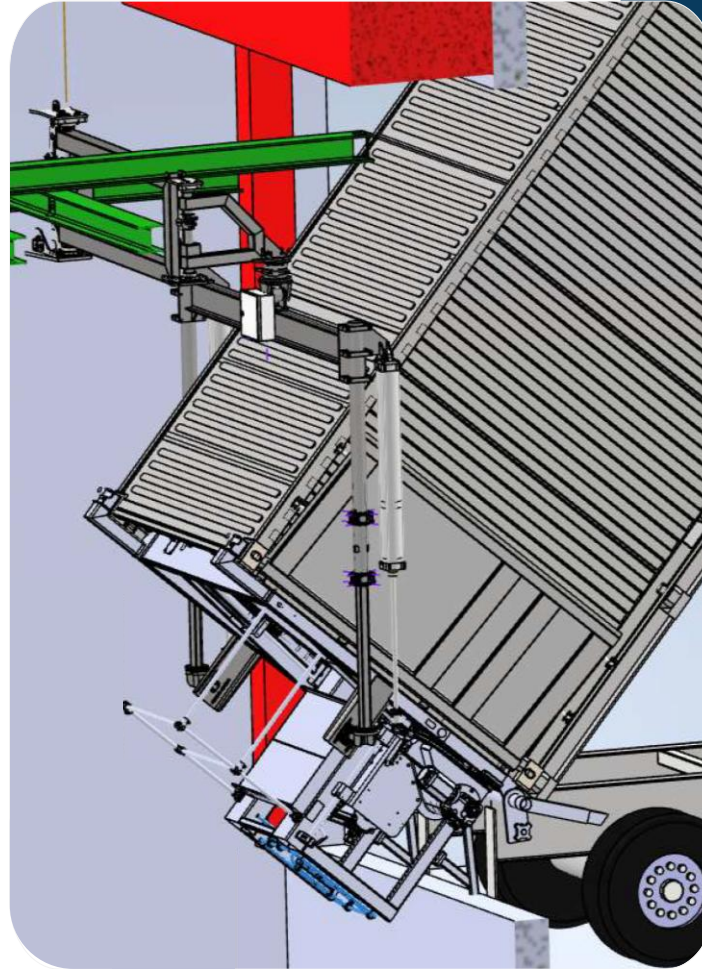

ATEX version including certification by
Bureau Veritas
Controlled conveying air values for the food
and pharmaceutical industries

Combi Station for supply chain flexibility

Can unload silo trucks and shipping
containers with one system - adapters for big
bag emptying also available
Naturally adapted to your needs as a stand-
alone solution

Now with CQF-Technology

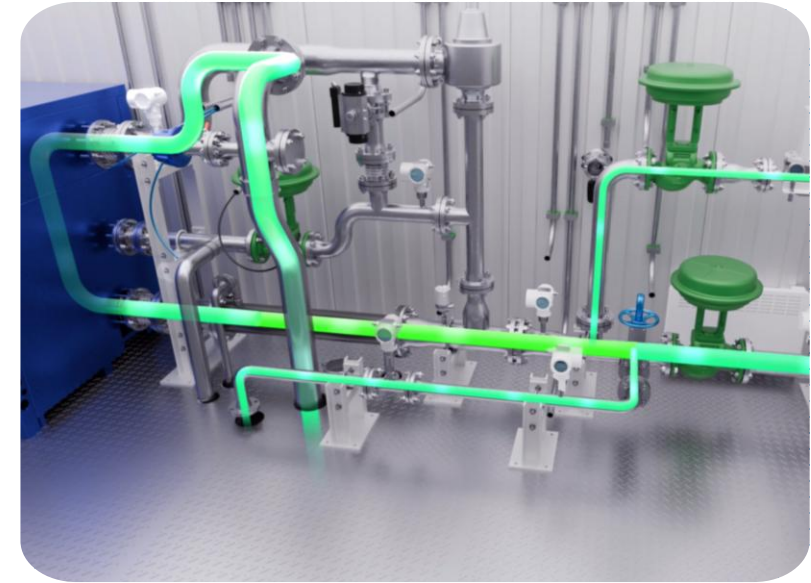

WWTec GmbH
& Co. KG –
**solutions for
your process**

For compacting bulk materials, the CES is now also available with the proven CQF technology. The handling device simplifies attachment to the container and your process can be automated.

Custom Solutions

WWTec GmbH & Co. KG – solutions for your process

What else we make possible:
The largest remote-controlled
ATEX-certified vacuum cleaner
and closed-loop pneumatic
conveying with nitrogen
