Our Team

WWTec GmbH & Co. KG – solutions for your process

We employ staff from all key areas of mechanical engineering. For you, this means that we design, build, program and install your machines ourselves in close cooperation - your solution from a single source!

Mechanical Engineering

Technology Container for Equipment & Operator

Required compressors and filters can be enclosed

Operator station with desk and touch panel

Weather-protected and air-conditioned working environment

Siloadmaxx Loading Machine

Mobile and stationary loading of 20'-, 40' - and 40'HC- containers

Suitable for food and ATEX applications

Communication interface with your plant

LFS Liner Filling Station

Stationary or mobile loading of 20' containers

Simple handling and automated operation

Plug-and-Play solution

**WWTec GmbH
& Co. KG –
solutions for
your process**

Leading manufacturer of mobile loading and unloading systems for shipping containers and exclusive service provider of SiloadmaxX GmbH.

Mechanical Engineering

WWTec GmbH & Co. KG – solutions for your process

Leading manufacturer of
mobile loading and unloading
systems for shipping containers
and exclusive service provider
of SiloadmaxX GmbH.

CQF Container Quick Flow

- Mobile unloading of all ISO containers
- Dust and contamination-free unloading
- Suitable for food and ATEX applications

Junior Cube Unloading Unit

- Mobile and stationary unloading for free-flowing products
- Compact design and simple operation

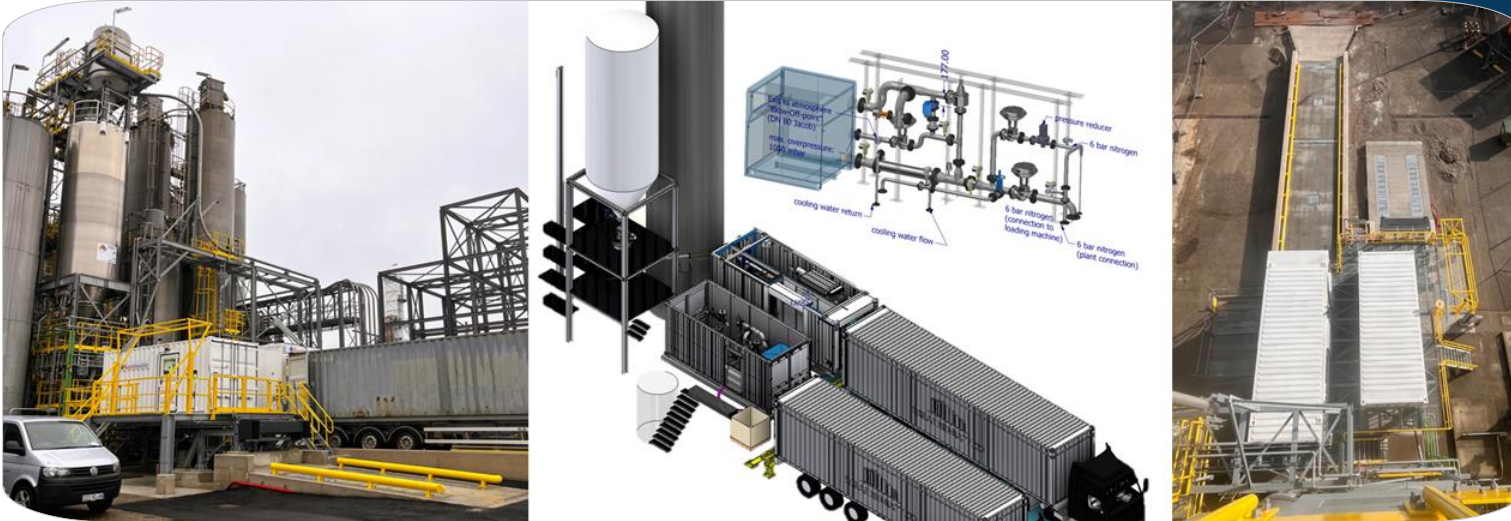

CES Unloading Station

- Weather-protected unloading environment
- Technology container with all required components
- Unloading using our proven CQF or Junior Cube technology

Plant Engineering

WWTec GmbH & Co. KG – solutions for your process

We successfully apply our expertise in bulk material handling to more complex plant engineering projects.

Project example: container loading of explosive PPO powder with nitrogen in a closed loop

Containers with liner bags are loaded with PPO powder from storage silos
Nitrogen as the conveying medium is reliably circulated to reduce consumption
Automated process sequence with its own control, conveying and filter technology

Plant Engineering

WWTec GmbH & Co. KG – solutions for your process

We successfully apply our expertise in bulk material handling to more complex plant engineering projects.

Project example: combined unloading of explosive hard wax granulate from containers and big bags in one station

Unloading of special containers and big bags at one system and subsequent conveying to designated storage silos

Automated process sequence with its own conveyor and filter technology

The loading of the special containers in this project is also done by Siloadmaxx

Service

WWTec GmbH & Co. KG – solutions for your process

We manage projects around the globe. A local team for global challenges.

Services for your solution

Worldwide support from our personnel for your commissioning, training or maintenance

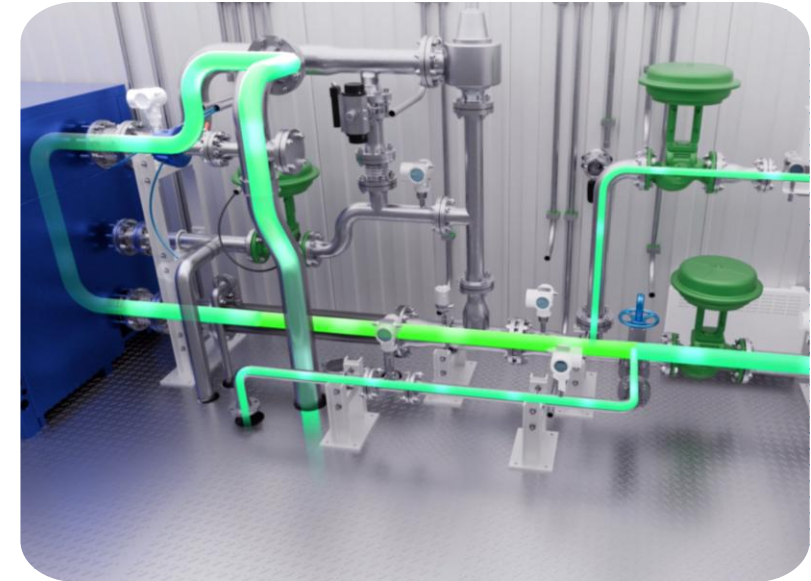

Installation and assembly of our machines by our technicians – wherever you need us

We accompany your machine through its product life cycle and are always on hand with help and advice

Custom Solutions

WWTec GmbH & Co. KG – solutions for your process

What else we make possible:
The largest remote-controlled
ATEX-certified vacuum cleaner
and closed-loop pneumatic
conveying with nitrogen
